

Product Information Sheet

STERI FOAM

A specially formulated alkaline cleaner and sanitiser for walls, floors, equipment and working surfaces. STERI-FOAM's incredible high-build foam action gives much longer contact time than conventional liquid products, and hence far superior cleaning and sanitising efficiency on even vertical and overhead surfaces.

Powerful STERI-FOAM provides effective cleaning and reliable disinfection in fish and flesh processing plants, abattoirs, food factories, bakeries, kitchens, breweries, distilleries, etc.

Designed especially for use with foam guns, either on-line or fitted to mobile pressure-wash apparatus, STERI-FOAM provides easy and effective application and rinsing in even high or awkward areas. No pre-dilution is necessary - simply turn on the water and foam

FEATURES

BENEFITS

Clinging Foam

Gives truly effective cleaning on large vertical and even overhead surfaces.

Active biocide

Provides effective sterilisation of surfaces while cleaning thus saving on labour operation while enhancing safety from infection.

Ready to use

Keeps operator time and down-time to a minimum while promoting safe handling.

Powerful

Penetrates, disperses and emulsifies fats, proteins, syrups and even fish deposits.

Application and Safety Information

STERI FOAM

Description: Alkaline surfactant system with built-in sequestering power to enable effective use in hard or soft water areas. Contains also flash-foam surfactants, foam stabilisers and modifiers, emulsifiers, solubilisers and active biocide.

Application: For use specifically with foam generating lances and with cold or hot water. Start the water flow and then open the restrictor on your chemical feed until you get the desired foam level.

Packaging: Available in 210 litre or 30 litre UN-rated poly-drums and in cases of 4 x 5 litre UN-rated poly-cans.

Physical Data: Appearance: A clear, pale-straw coloured, slightly viscous liquid. Dilutes readily with water.
Relative Density: about 1.09 at 20°C
pH (2% solution): 12-13

Emergency Action On:

Skin Contact: Rinse off with water.

Eye Contact: Flush out with plenty of water.

Ingestion: Drink plenty of water and seek medical attention. DO NOT try to induce vomiting.

Spillage: Absorb in granules, sweep up, bag and bin.
