

Product Information Sheet

KLEEN

A handy, ready-to-use, general purpose, combined cleaning and sanitising fluid. KLEEN is designed for use in kitchens, hospitals, veterinary practices, nursing homes, hotels & other accommodation areas and anywhere else that hygiene is a necessity.

*A combination of neutral degreasing surfactants and safe, broad-spectrum biocides means that KLEEN can be used with confidence on food preparation surfaces, food processing equipment, medical or veterinary work surfaces, shower units, tiles, floors and walls in all such environments. There is no risk of taint to foodstuffs in normal use – for food surface and equipment applications note that the actives have been tested and pass EN 1276 and EN 1650 (for *C. albicans*) when used as directed and with a minimum contact time of 5 minutes.*

Versatile KLEEN will remove and control mildew in showers and toilet areas and KLEEN, being of low toxicity and low irritancy, is also safe for use in pens and houses for most mammalian and bird species.

FEATURES

BENEFITS

<i>Odour-free</i>	<i>no risk of taint to foodstuffs, as there might be with perfumed disinfectants.</i>
<i>Safe</i>	<i>cleans and sanitises without creating corrosive or toxic risks to staff or animals.</i>
<i>Ready-to-use</i>	<i>no risk of using the product dangerously over-diluted or expensively under-diluted.</i>
<i>Versatile</i>	<i>one product with many uses, keeps your hygiene inventory under control.</i>

Application and Safety Information

KLEEN

Description: Aqueous solution of quaternary type biocides, together with grease-cutting non-ionic surfactants.

Application: Simply spray liberally over that area to be cleaned. Use a brush to scrub away stubborn soiling and/or wipe all surfaces clean with a damp cloth.
To ensure effective sanitising, finally spray over all surfaces and allow to dry-off without rinsing. Leave food handling surfaces for at least 5 minutes before using.

Packaging: Available only in a handy 500ml trigger-spray bottle, packed in cases of six.

Physical Data: Appearance: Clear, red, mobile liquid.
- dilutes readily with water in all proportions.
R.D at 20 °C: about 1.0
pH value about 7-8

Emergency Action On:

Skin Contact: Wash off with hand-cleanser and plenty of water

Eye Contact: Flush out with plenty of water.

Ingestion: Drink plenty of water and seek medical attention. DO NOT try to induce vomiting.

Spillage: Absorb in granules, sweep up, bag and bin.

Other Information:

Wear light rubber gloves when using this product - all detergents can dry the skin.
