

## Product Information Sheet

# PRO-COAT

*A dual purpose product, providing a sacrificial release coating which prevents bitumen, tar and heavy oils adhering to metal or painted metal surfaces and also a clean-up solution for hot boxes, vehicles and tools involved in road laying, etc.*

*Versatile Pro-Coat is also water-dilutable, non-flammable and biodegradable, making it a truly "green" solution to the perennial problems involved in tar and bitumen handling.*

*Pro-Coat's highly useful features mean that it will be welcomed by road-laying and road-repair operations, by firms delivering asphalt mixes, by firms manufacturing asphalt and bitumen mixes and by any company who use, operate or even hire equipment used in handling such materials.*

### FEATURES

### BENEFITS

*Concentrated product*

*dilute at point of use, thus saving on storage space, especially on vehicles carrying product to site.*

*Non-contaminating*

*may be used with all forms of tar and asphalt mixes without any risk of upsetting the adhesion or setting times.*

*Versatile*

*acts both as a sacrificial coating, to prevent overspill adhering firmly to surfaces, and as a cleaning aid to quickly lift those deposits after work without difficulty.*

*Non-flammable*

*allows safe use direct on to hot-boxes with no danger to the user.*

*Biodegradable*

*allows regular use without fear of damaging the environment*

## Application and Safety Information

### PRO-COAT

**Description:** *An aqueous dispersion of biodegradable, non-volatile, low-toxicity organic materials.*

**Application:** *Can be used diluted with 20-50 parts water. The solution should then be applied to the clean surfaces of equipment and allowed to dry before use. When cleaning is required the same dilution can be used with agitation to clean the surface.*

**Packaging:** *Available in 210 litre or 30 litre poly-drums and in cases of 4 x 5 litre poly-cans.*

**Physical Data:** *Appearance: Opaque, viscous fluid which disperses easily in water  
Relative Density. About 1.004  
pH: (neat product) about 9*

#### Emergency Action On:

**Eye Contact:** *Flush out with plenty of water.*

**Ingestion:** *Drink plenty of water and seek medical attention. DO NOT try to induce vomiting.*

**Spillage:** *Absorb in granules, sweep up, bag and bin.*
